Analysis Summary

Error

Description

WARNING - DebugDiag was not able to locate debug symbols for **Qt6OpenGL.dll**, so the information below may be incomplete.

In stellarium_PID_1580_Date_12_06_2023_Time_08_38_43PM_361_First Chance Access Violation.dmp the assembly instruction at **Qt6OpenGL!QOpenGL2PaintEngineEx::setState+56** in **C:\Program Files\Stellarium\Qt6OpenGL.dll** from **The Qt Company Ltd.** has caused an **access violation exception (0xC0000005)** when trying to **read from** memory location **0x000001c0** on thread [0](#)

Recommendation

Please follow up with the vendor **The Qt Company Ltd.** for **C:\Program Files\Stellarium\Qt6OpenGL.dll**

Notification

Description

DebugDiag determined that this dump file (stellarium_PID_1580_Date_12_06_2023_Time_08_38_43PM_361_First Chance Access Violation.dmp) is a **crash** dump and did not perform any **hang** analysis.

Recommendation

To run both hang rules and crash rules on crash dumps, select the following option in the *'Preferences'* tab of the *'Settings'* page in DebugDiag.Analysis.exe:

'For crash dumps, run hang rules and crash rules'
